CLEVELAND CLINIC HOSPITAL

welcome

our values

Fundamental values like the foundation of Cleveland Clinic's success.

Quality Integrity
Compassion
Collaboration
Commitment

While our mission is to help our patients, we also want to help our people. Because the success of the patient is always the first and most important priority, it is how we do it that counts.

Cleveland Clinic Hospital is a 170-bed, full-service acute care facility and the first hospital in Florida, Florida, opened in July of 2010. We offer a full range of inpatient and outpatient services to local residents and to the South Florida community at large.

Cleveland Clinic Hospital serves patients of all ages. Our unique combination of care blends technology with medical and responsive care in a personal touch.

Providing exceptional care and highly sophisticated technology, we at Cleveland Clinic Hospital have a reputation of being a top center. We were the first hospital in Broward County to provide mammography services, robotic surgery and the first in South Florida to use a state-of-the-art robotic system (da Vinci) for cardiac patients before they arrive in the emergency room.

Cleveland Clinic Hospital is part of a 11-acre, fully integrated medical campus that includes a medical library, laboratory, proton radiotherapy, and a modern medical conference center. Most importantly, it is adjacent to Cleveland Clinic Florida, where over 100 staff physicians representing more than 40 medical specialties practice medicine in vivo.

All have Florida licenses and are board certified or board eligible, and all are credentialed by Cleveland Clinic Florida. Therefore, their competence is not based on the number of patients that see us, but on the way they work.

Cleveland Clinic Florida physicians routinely see patients in their on-campus offices. However, the proximity of Cleveland Clinic Hospital allows them to take care of patients who are admitted to a hospital in another, but the hospital is nearby, steps away.

about the hospital

patient services

24-Hour Emergency Care
Advanced and proven treatments are available for adults and children in our fully equipped emergency rooms, staffed around the clock for emergency medical care.

Advanced Heart Care
The Cleveland Clinic Florida Heart Center is a completely integrated program offering advanced cardiac care for all heart stages and levels of heart disease. Among the Heart Center services available through Cleveland Clinic Florida are diagnostic tests like stress echocardiography, PET and ultrasonography studies, as well as cardiac catheterization and percutaneous catheterization. The hospital also includes an open heart surgery center where some of the most advanced techniques and cardiac technology are used, allowing surgeons to perform the most advanced, robotic-assisted heart surgery.

Surgical Services and Endoscopy
In one of Florida's largest surgical hospitals, Cleveland Clinic Florida has the latest in minimally-invasive surgical techniques available, all in one central location. Many types of minimally-invasive surgical techniques provide a full range of surgical options, including some using small incisions. High-tech endoscopy allows physicians to perform most of their more extensive and diagnostic procedures.

Physical and Speech Therapy
All aspects of physical therapy programs at Cleveland Clinic Florida are designed and managed to meet the needs of each individual. A large body of studies demonstrate the effectiveness and safety of a full staff of specialists ready to assess functional ability and provide a specific recovery.

Sophisticated Diagnostic Services
Cleveland Clinic Hospital is equipped with the most advanced diagnostic services available, including CT and PET scans, MRI, and a full range of laboratory, ultrasound, endoscopy, and interventional services, as well as interventional radiology services.

healing hospitality

A health care professional, we are eager to address our patients' needs - not only with the use of the latest technology, but also through the right approach and environment.

We know that the manner and setting in which patients receive care can play a significant therapeutic role. Inspired by leaders in the hospitality industry, we have created and adopted Healing Hospitality™, a patient centered approach that blends medical science with patient hospitality.

Our goal is to provide patients with convenient services that include "before and beyond." To that end, we have created a friendly greeting, meals and soothing music options with a total care approach. In addition to meals and beverages that are larger than their average hospital counterparts, we offer sophisticated furniture, elegant yet home-like kitchen equipment, heated towels, shower, hair dryer, gallery framed artwork, and deck, make towel parking. To make it comfortable and relaxing, we have a nightstand to hold the needs of patients. In fact, we have a 24-hour hotel-style dining stand ready for our late patients.
